

### 3.2.1 - Developing and presenting coherent and imaginative resources for student learning

#### 9893 2024 Semester (S1) - Physical Education, Sport and Society

565549 John has been incredibly helpful with giving resources to us. It's a research heavy unit and I'm glad he is trying his best to lower the initial cognitive load.

573056 John has been regularly updating us with more and more resources and videos.

#### 9893 2023 S1 - Physical Education, Sport and Society

484466 I find that most of the information I have learnt during this course has been from the readings - great quality readings, but sometimes lots of work to get through.

#### 9893 2022 S1 - Physical Education, Sport and Society

434186 I can see the amount of hard work and effort that is provided to us and have always respected how above and beyond you go with providing resources, reading articles etc!!

432009 The provision of resources to assist with assignment was excellent (readings, workshops and publications).

423183 The readings are actually great to read too - not something that can be too often said for weekly readings.

#### 9893 2021 S1 - Physical Education, Sport and Society

360146 John puts a lot of effort into the resources he provides, beyond just the lectures, which are always informative and easy to understand, with added resources.

#### 9893 2020 S1 - Physical Education, Sport and Society

285631 John provided us with a range of different learning resources such as Podcasts, videos, poems, stories, Athletics Australia and guest speakers to help and develop our learning.

288375 I particularly enjoyed the voices-from-the-profession, as they gave very good insights into different people that are involved in sport and education.

289230 I appreciated the voices-from-the-profession element of the unit. It allowed me to use how we could apply content learnt and see the relevance for tackling contemporary HPE classroom issues.

290027 I found the voices-from-the-profession a great addition as they were easy to listen to and had great pieces of advice.

291114 The inclusion of voices-from-the-profession further enhanced my learning.

293644 The assignment was clear and John assisted with finding resources and providing us with a range of resources. I additionally, I really liked the guidance questions used for the quiz.

294239 Many great resources were given that I can use during my time as a teacher.

291915 The voices-from-the-profession were great.

9893 2019 S1 - Physical Education, Sport and Society

193981 The content is well presented and the readings, lecture and workshops are all well connected.

9916 2024 S1 - Sociocultural Foundations for HPE In Schools

569985 I enjoy learning it and watching/reading all of the resources he provides for us.

9916 2023 S1 - Sociocultural Foundations for HPE In Schools

484151 Really enjoying the pracs especially the dance lesson. I thought this was a great way to explain figurational sociology.

492627 Workshops are really enjoyable and I like the links to weekly lectures/readings. I also really appreciated how being a beginning unit, the prac at (school name) was a short rotational activity rather than a full lesson plan- good way to introduce us into the PE plans given that we have not experienced lesson planning and operating the lesson in this particular discipline.

498946 Sometimes the amount of readings are a bit hard to complete but I like the idea of only having to read the intro or certain paragraphs for example.

9916 2022 S1 - Sociocultural Foundations for HPE In Schools

402328 John is pretty awesome. I love how he uses many means of sharing info and multiple options to absorb the unit information.

430741 I really like the effort John went to incorporate podcasts as part of our weekly module work - I think listening to others in the profession is a great way to learn, and I also thought the opportunity we got to hold one of our workshops at (school name) was amazing. The opportunity that gave all of us, and the exposure to gain some individual feedback on where we are at very early in our careers was invaluable and extremely enjoyable!

418657 John has provided us with plenty of readings and resources that we can use beyond this unit which is really appreciated!

9916 2021 S1 - Sociocultural Foundations for HPE In Schools

336475 I really like how the lessons are planned out for us they feel a bit more hands on which helps me learn for example matching the glossary definitions in groups.

359519 Resources were also practical and useful, like the varied learning, including Fundamental Movement Skills and ideas.

9916 2019 S1 - Sociocultural Foundations for HPE In Schools

213857 The case studies in lectures are helpful for putting the theory to practice.

221583 He (John) sets relevant readings and also links in the practical workshops really well.

9916 2017 S1 - Sociocultural Foundations for HPE In Schools

77280 He highlighted important passages in assigned reading to emphasise important information.

9905 2021 S2 - Secondary Health and Physical Education PCK 2

381163 I have loved this unit and obviously, wish that it could have been face to face (this unit was taught during COVID and online – normally delivery would have been at a school-based clinic with practical teaching experiences in classrooms or in physical education settings). The teacher has put

in a lot of effort and I love that he has got us all to engage with the work. I have learnt so many different examples of how to teach in the classroom that I will be able to apply for my future teaching.

386414 Considering John had to completely change this unit due to Covid-19 within a week, I think that has been extremely useful for us as future educators. The amount of effort you must have put in for all of these workbooks and resources is a credit to you as a teacher.

386417 I believe the content we work through during the workshop is incredibly informative and relatable to teaching practices that will be beneficial for my future career as an educator.

386418 A lot of work has gone into changing this unit into an online learning experience (because of COVID), which is appreciated. It was a shame to miss out on the physical workshops and developing quality assessment in PE. However, the health content has been useful.

386437 I always look forward to his lessons - and I can see how I would use the strategies he is teaching us. For example, he showed us video clips and got us to unpack how we could teach those videos and themes in class. We also spent more time unpacking the HPE AC Curriculum document which is helpful as before Lock-down we probably would not have had a chance to do that as the workshops are so fast-paced.

393948 John made this unit as engaging as possible throughout the semester especially when there were so many issues with not being able to complete the in school workshops due to lockdown. However his level of effort and planning was evident throughout the whole semester as he provided extremely relevant and insightful content for the health curriculum, which is something that has been lacking throughout the degree.

396176 I really enjoyed this unit and I was looking forward to doing it face to face, however when starting online John made it extremely engaging providing a variety of pedagogy and resources for the classroom. He made a massive effort to create workbooks and make sure people were engaged. However I would of liked to see this from the first lesson online (e.g making people put cameras on from first week online).

396651 Thanks John, I'm glad we were able to create lesson plans this semester for health and hopefully we are still sharing these with everyone so we all have lots of resources for when we go out into our own teaching.

### 9905 2020 S2 - Secondary Health and Physical Education PCK 2T

314703 John further provided numerous resources for teaching and assessment and this was beneficial.

315663 The exposure to wet-weather-lesson-plans was very enlightening, as it came in to affect numerous times throughout the unit and with John's knowledge, which he has now instilled upon us, I feel far more confident in my ability as a future educator.

315663 John has gone above and beyond in this unit. His support throughout the unit was amazing. His feedback on our lesson plans was so informative and this has not only helped me improve my lessons but also my whole approach to lesson planning. His knowledge of evidenced based approaches has greatly improved my understanding of these and allowed me to significantly improve my classroom practice through the implementation of these approaches. Adding the wet-weather-lesson-plans was a great addition to the structure of the class. It gave us experience

providing quality physical education can be completed in the classroom setting and this will inform my future practice as a teacher.

324450 Content of the unit was highly specific to our teaching clinics and John provided the necessary resources for our teaching teams to best provide quality PE. We further received the opportunity to teach wet-weather-lessons and create wet-weather-lesson-plans. This felt largely due to John's high expectations which positively influenced my teaching team to improve our practice.

315663 The knowledge and supporting material such as AITSL SWOT analysis and the self-study approaches/journal articles/ACHPER have all been noted down and will be implemented in all my future education endeavours.

316168 The week 2 campus-based class helped us to provide assessment resources and gave us ideas of how to incorporate assessments in our classes.

### 9905 2019 S2 - Secondary Health and Physical Education PCK 2

249619 The amount of resources that have been provided has been the highlight for me, I have collected every resources, idea, program, article and it has given me great confidence for my first year in teaching.

258799 I appreciate the resources you have leant us on ideas for teaching activities and assessment and can't wait to implement these out on practicals!

258774 The teaching models-of-instruction (Metzler, 2017) and the implementation of these were highly beneficial for future use. The amount of evidence-based assessment techniques was an awesome way of exploring different ways of assessing students and provided great resources to use in future teaching.

258813 As a student who has experienced the old and new PCK style units, I believe the way PCK PE 2 has been structured has prepared me more for the real world of teaching. John has provided us with a range of resources and is always there to help when we need. The effort John puts into the unit is outstanding and as a final year student who is about to graduate, I feel this unit has prepared me with a wide range of resources, teaching styles and activities that I can take with me as a beginning teacher. The content John provides is recent and relevant, unlike some other education units we have to complete.

### 9887 2018 S2 - The Practice (PCK) of Teaching HPE

171051 We are provided teaching resources each week to engage with and these are very useful resources for the future.

185302 Overall, I have developed my confidence in teaching PE and have been given a range of resources which I can use in my future classroom.

### 9887 2017 S2 - The Practice (PCK) of Teaching HPE

97664 Would have been more useful pre my final prac placement, when I could have truly utilised the unit convenor's excellent resources and activities. A unit full of great ideas and brilliant suggestions.

### 6731 2016 – Health and Movement Education 1

7234 The resources in the Health component of the unit were of a high quality and provide good scope for teaching health in a primary classroom. I will definitely be seeking these out when I become a teacher.
